	Procedures for evacuation were as follows. A list of politically unreliable persons was submitted to the STB by the local national committee. Persons whose names appeared on the list were then summoned and told that, according to the law regarding the protection of the state border, they must leave the area within a month. Each was given tection of the state border, they must leave the area within a month. Each was given tection of the state border, they must leave the area within a month. Each was given tection of the state border, they must leave the area within a month. Each was given tection of the state border, they must leave the area within a month. Each was given tection of the state border, which arranged for transportation, For this checked by the local national committee, which arranged for transportation, For this last purpose trucks were used for distances up to 100 km; beyond this limit the railroads were used.	
	In March 1952 a military delegation composed of 20 Soviet and Czech officers arrived at the Chara I factory; six of these men were Soviet naval officers. The delegation went through a detailed three-hour inspection of the factory. General opinion held the visit to have something to do with transferring the entire factory elsewhere.	
•	About 50% of the Ohara I personnel was very young and easily tired; they accomplished little work. None of them were members of the Communist Party; Communist propaganda was weak and the workers demonstrated little interest in polities. When Communist meetings were held, attendance was sparse and even Party members found excuses for not attending. The population of Asi was extremely dissatisfied with the regime, would have liked to escape to Germany but the barbed wire and felled trees along the border prevented it.	
	The message center for all Chara factories was located in the Chara I plant in Asi. All mail was received there, sorted and delivered to the other plants and departments. Mail for the Ministry of Light Industry in Prague was collected from all departments, placed in one envelope and dispatched as a unit, to save postage. Secret reports from the factories to the Ministry of Light Industry in Prague were dispatched in a yellow envelope with a red border.	
	The factories have their own guard and militia; the guard consists of eight men armed with pistols, while the militia had 40 members, of whom 15 were women. The militia with pistols, while the militia had 40 members, of whom 15 were women. The militia with rained twice weekly with rifles and light machine guns. Assumition was started within a trained twice weekly with rifles and light machine guns. Assumition was started within a factory area, as were the weapons. The militia was on guard day and night.	0.5%
